cartertierney0@gmail.com | cartertierney.tech | (404)807-0557 | linkedin.com/in/carter-tierney | github.com/ctsc

EDUCATION

Georgia State University

M.S. Computer Science | B.S. Computer Science | Spring 27 GPA 3.5

Leadership: VP Outreach progsu(**1200+ Members**), President IEEE GSU chapter, President Barbell Club, Grad TA

Relevant Courses: Cloud Computing, Machine Learning, Algorithms/Data Structures, Data Science, Network Security

TECHNICAL SKILLS

Languages: Python, Java, TypeScript/JavaScript, SQL, HTML/CSS

Frameworks: React, FastAPI, NodeJS, React Native, Express, PyTorch, Scikit-Learn, Pandas, NumPy, XGBoost

Tools: AWS, Git, Claude, Cursor, Docker, CI/CD, PostgreSQL, GCS, Firebase, Supabase

EXPERIENCE

Software Engineering Intern

June 2026 – Aug 2026

FanDuel

- Engineering an internal automation SaaS, using AWS services to internally deploy and share frontend websites
- Architected IaC using AWS terraform to allocate Cloudfront distributions on S3 buckets storing deployed projects

AI Software Engineer

April 2026- Present

Handshake AI Contract Projects

- Optimized AI generated code by analyzing model solutions across open-source projects to drive model efficiency

Graduate Teaching Assistant

Jan 2026 – Present

Georgia State University

- Educated technical concepts in assembly language, Linux/Unix systems, memory hierarchy, and computer hardware architecture for a cohort of **35** students

Co-Founder

Sep 2025 – March 2026

QuantDFS quantdfs.com

- Co-founded a sports analytics SaaS platform using ML models and quant analysis for optimized bets and lineups
- Led frontend development and AWS DevOps, reaching **30 active users** within one month of beta deployment

Freelance Developer

Aug 2025 – Present

Paulk Clinic Website

- Collaborated with stakeholders, and redesigned a legacy clinic website using PHP/CSS to drive 2.5x increase in monthly search impressions and 2.75x more conversions over 3 months

PROJECTS

VoiceVitals: 1st Emory Hacks | *TypeScript/React, PyTorch, FastAPI, GCS/Firebase* | Devpost Link Nov 2025

- ML pipeline (PyTorch + FastAPI) for early dementia detection from voice recordings, engineering **153** prosodic and voice-quality audio features to improve F1 score from **.2** to **.68**
- Deployed a scalable SaaS using Google Cloud Services and a React/Typescript dashboard for clinicians to upload recordings, visualize results, and securely store patient data

wdym86: 2nd UGAHacks XI | *React, Node.js, FastAPI, Gemini API, AWS, Docker* — *wdym86.tech* Feb 2026

- Implemented system design for full-stack restaurant management platform with POS, inventory tracking, and admin dashboards across **25+ pages** and **100+ API endpoints**; containerized with Docker and deployed on AWS with end to end unit and integration testing across all modules
- Developed a NumPy demand forecasting model to predict sales velocity and automate inventory reorder timing; integrated Gemini API with RAG pipeline for data analytics and generate per-restaurant operational insights
